Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3753

This office action is responsive to communications filed 09/22/2003.

**Claims 1 – 20 are pending.**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1 – 4 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palmer et al. (US 5,791,073) in view of Zlotos (US 6,588,988).

Palmer et al. discloses a vacuum safety valve (31) for a vacuum system, the safety valve having a circumference and comprising:

An internal chamber (27) that is adapted to communicate with a vacuum system,  
and

At least one selectively openable radial port (48), the radial port being positioned to open at a point on the circumference of the safety valve,

Art Unit: 3753

Wherein the safety valve is adapted to open the at least one radial port.

The patent to Palmer discloses the claimed invention with the exception of explicitly disclosing automatic opening of the radial port when vacuum within the safety valve raises above a predetermined limit.

Zlotos. discloses a vacuum conveying arrangement wherein a valve (9) is automatically opened when vacuum level within the system is raised beyond a predetermined limit, for the purpose of safely controlling the vacuum level within the system.

It would have been obvious to one ordinary skill in the art at the time the invention was made to have provided in Palmer et al. automatic opening of the valve i.e. the radial port for the purpose of safely controlling the vacuum level within the system, as recognized by Zlotos.

It is noted that the combination of Palmer and Zlotos necessarily performs the method recited in claim 19 in its usual and normal operation.

4. Claims 5 – 18 and 20 are allowed.

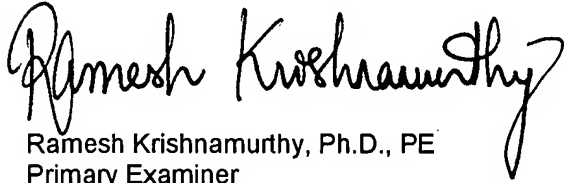

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramesh Krishnamurthy whose telephone number is (571) 272 – 4914. The examiner can normally be reached on Monday - Friday from 10:00 AM to 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene L. Mancene, can be reached on (571) 272 – 4930. The fax phone number for the organization where this application or proceeding is assigned is (571) 273 – 8300.
